

Roberts Cove Basin LLC

Preparing your boat for winter Storage

August 2019

Introduction

- This document is based on the best information available and is intended to provide information to boat owners that will allow them to prepare their boats for winter storage. We have also provided links to articles that will provide more information.
- Roberts Cove Basin, LLC does not warrant or guarantee the information in this document but does encourage boat owners to do their own investigation and research before making their own decisions

Removal of personal items, food and other products that may freeze

- Please remove all personal items such as radios, fish finders, and other electronics, life jackets, vests and other personal safety equipment.
- You can leave your fire extinguisher in the boat.
- Remove any cloth items not part of the covering system.
- Towels, cloths and similar items are attractive to rodents for making nests. Remove all food products, they attract animals and rodents and vermin. Remove any items that would freeze such as cleaners, etc.

Animal intrusion protection

- There are many animal intrusion products on the market and you may wish to put those in your boat.
- Roberts Cove Basin, LLC uses natural products such as animal urine, spearmint and peppermint oils.

Boat coverings

- If you are having your boat shrink-wrapped, we will remove your boat covering and place it in the boat for the winter storage.
- If you wish to store the covering at your home please let us know.

Battery Storage

- Battery storage can be accomplished in several ways, some people leave the battery in the boat, and others take their battery home.
- You can request Roberts Cove Basin, LLC can store it.
- Batteries should be fully charged at the end of the season

Gas storage general winterization articles. There are several schools of thought on gas storage over the wintertime. Below are two of the more common processes:

Leaving fuel in your tanks over the winter.

- One of the common recommendations from the major boat companies is to fill the fuel system and add a winter stabilization product and run the boat for about an hour. The winter stabilization product should be added per the manufactures recommendations. The product should be suitable for 6 to 8 months of storage time.
- Refilling your fuel system after the hour run period.
- Fuel purchased at Roberts Cove Basin, contains Valvtect which is one of the industry's best additives to prevent fuel problems caused by ethanol. Valvtect brochures are available at the gas shack with more details

Removing all fuel from the system for the wintertime

- Prior to leaving your boat for winterization and storage, add a fuel stabilization product, and use as much gas as possible. If you have portable tanks you may wish to use the gas in another piece of equipment.
- If requested we will remove the gas from your boat and dispose of it thru our oil and gas recycling program.

Waste oil and Gas disposal

Due to environmental rules and regulations we now must dispose of Oil and Gas in a more complex and costly manner. We are now charging waste disposal fees for all motor oil, gear oil and gasoline. The disposal fees will be included in your winterization and/or maintenance bills.

The costs for these items are:

Waste oil	\$1.00 per quart or portion thereof
Waste gear oil	\$1.00 per quart or portion thereof
Gasoline	\$3.00 gallon or portion thereof
